Experience

Freelancer & Owner   Feb 2023 – Present
Onavix Studio   *Remote*

- Founded and led a freelance web development studio, delivering custom-built websites and applications to 30+ clients across industries including media streaming, e-commerce, SaaS, and personal brands
- Built and maintained responsive, high-performance applications using Next.js, React, and Node.js, increasing client conversion rates by an average of 35%

Senior Technical Coordinator   Aug. 2024 – Present
IEEE CS   *Hybrid, Part-Time*

- Led and contributed to multiple technical initiatives including full-stack projects, and internal tool building
- Organized and conducted hands-on workshops, coding competitions, and mentorship sessions; regularly utilized Next.js, React, Express.js, TailwindCSS, and Python for club projects

Projects

Lumeroo - Streaming Platform | Next.js, Node.js, MongoDB, TailwindCSS   May 2025 – July 2025

- Developed a media streaming platform with video/image upload, HLS playback, nested comments, profiles, subscriptions, and content discovery
- Built secure backend with Express, MongoDB, JWT auth, Google OAuth, and modular API routes for auth, content, profiles, and moderation
- Deployed with NGINX reverse proxy and FFmpeg-based video processing for efficient HLS real-time streaming

UnchainedGPT - AI-Powered Chatbot | Next.js, MongoDB, TailwindCSS, Socket.IO   Dec 2024 – Mar 2025

- Developed a platform providing access to AI models like o3-mini, Claude 3.7, Midjourney and others
- Built and scaled the platform to support 500+ users and process over 10,000+ monthly AI interactions with efficient database management
- Implemented real-time communication using Socket.IO and Hono.js with average response time under 120ms

Personal Portfolio Website | Next.js, Figma, Tailwind CSS   May 2024 - Present

- Designed and developed my portfolio website using Next.js, attracting over 500 unique visitors monthly
- Included a blog page for writing about project breakdowns and personal insights
- Crafted smooth animations and interactive UI using React hooks and Framer Motion, improving average session time by 45%

Bantr - Real-Time Chat App | React, Node.js, Socket.IO, MongoDB, Tailwind CSS   Sep 2024 – Oct 2024

- Built a scalable, full-stack messaging app with real-time communication via WebSockets and a channel-based chat model inspired by Discord
- Designed a clean, modern chat UI with user status indicators and per-channel sockets for optimized performance

Technical Skills

Languages & Databases: JavaScript, TypeScript, Python, C, C++, SQL (MongoDB, Prisma), HTML/CSS

Frameworks & Libraries: Next.js, React, Node.js, Express, Hono.js, Tailwind CSS, Flask, Socket.IO, Bootstrap, shadcn/ui

Developer Tools & Platforms: Git, Vite, Visual Studio Code, Postman, Figma, Burpsuite, Oracle, AWS, Vercel, Render, Stripe

Privacy Notice

Due to privacy concerns, this resume has been modified to remove personally identifiable information such as my college, workplace and other sensitive details.
